

CASE STUDY

AMPHIBIAN AND REPTILE FENCING

Client Name

T C M LTD

Site:

MALTBY QUARRY, OLD BRICKS WORKS

Contract Start: 28.03.2010

Contract Finish: 30.04.2010

Description of works:

Supply and Installation of TRAP Fencing of Approx 6000 meters. To aid the translocation of Great Crested Newts.

The TRAP Fencing was installed inline with plans drawn by the Supervising Ecologist. The Methods and Route of installation were agreed and discussed in detail prior to the commencements of works.

Reeve-Tec site staff are all experienced in installing both Temporary and Permanent TRAP Fencing and working with T C M we have a good ecological experience and awareness which ensures that works on site are carried out in a conscientious manner at all times.

Problems Reeve-Tec Membranes overcame:

- Transportation of materials
- Installation of TRAP Fencing through Rough Quarry Terrain i.e., Broken Bricks, Chalk, Sand Stone, Clay etc.
- Strict Installation Programme
